

IPPF Commitments Generation Equality Forum (GEF)

June 2021

1. IPPF commitment on Abortion

By 2026, IPPF will work to accelerate universal access to safe abortion care centered on three principles - **rights-based, reproductive justice and gender transformative** - with a focus on the following strategies:

- IPPF will expand and improve the provision of abortion care through 102 Member Associations, including quality medical and surgical abortion, **person-centred abortion self-care** support; and **abortion care beyond 12 weeks gestation** through a simplified outpatient model using task-shifting to mid-level providers, including self-managed medical abortion.
- IPPF will fully integrate abortion care into **humanitarian preparedness and response** as full realization of SRHR, with all IPPF emergency responses providing abortion care as a standard part of the MISRP.
- IPPF will advocate for the **decriminalization of abortion** and the removal of coercive policies and legislation on abortion in 25 countries, and advocate to donor governments and agencies to remove restrictions preventing work and dialogue on abortion, including the permanent repeal of the Global Gag rule.

2. - IPPF & Donor countries commitment Abortion & Comprehensive Sexuality Education (CSE)

Note: Phrasing agreed by donors. Governments still endorsing.

The Governments of The Netherlands (and others to be confirmed) in collaboration with IPPF and other global partners will work together towards the realization of universal access to sexual and reproductive health and rights, quality care and services, information and education, including comprehensive sexuality education, and thus contribute to achieve the Action Coalition 3 target of 50 million more adolescent girls and women in all their diversity who have access to these sexual and reproductive health and rights and services by 2026.

3.- IPPF - GEF Action Coalition collective Commitment on Abortion

Note: This is a joint commitment of the [GEF Action Coalition on Bodily Autonomy and SRHR](#) which IPPF is one of the leads of.

We commit to expand access to safe abortion for all people who can become pregnant by joining global advocacy initiatives to influence change in national legislation in as many countries as possible that ensures that abortion is decriminalized and that legal and policy barriers to abortion, including to self-managed abortion, are removed.

4.- IPPF GEF Action Coalition collective Commitment on CSE

Note: This is a joint commitment of the [GEF Action Coalition on Bodily Autonomy and SRHR](#) which IPPF is one of the leads of.

Commit to providing a unique platform with at least 80 members representing various sectors and regions, including youth-led organisations, for collaboration and building a strong, united voice to promote comprehensive sexuality education, address resistance, coordinate strategic response to influence national policy development and finance for CSE delivered in and out of school via evidence-based modalities. Through the Global Partnership Forum, partners will facilitate and promote collaboration on key, common advocacy, research and programming objectives in order to enhance programme effectiveness and create a first-of-a-kind platform for strategic partnership on CSE. This new Platform will bring an enabling environment to showcase good practices related to CSE, mobilize global, regional and national communities to advance the policy and social dialogue on CSE, grow strategic information and evidence-based research, as well as facilitate coordinated leadership on CSE.
