

AGENCY IN CHARGE

The Department of Health (DOH) is the primary agency advocating the implementation of the MISP-SRH with affected local government units in times of disasters and humanitarian crises, the DOH:

1. Activates the Reproductive Health Coordinating Teams (RHCTs) and implements the MISP in their locality. You may contact your regional Center for Health and Development or the Local Government in the affected disaster area for coordination.

Structure of Local Reproductive Health Coordinating Team

- i. Chair: PHO/MHO/CHO
 - ii. Co-chair: Humanitarian Partner in SRH
 - iii. Members:
 - iv. Local Health Office and Social Welfare Chief Hospitals, Women and Children Protection Unit (WCPU), Local PNP (WCPD Officer), Local DRRMO, Local Government Operations Officer, Sangguniang Kabataan (SK), CSOs/NGOs, Local Nutrition Action Officers, Association of Barangay Captains.
2. Links pregnant women including adolescents to health service providers
3. Engages people and groups among communities to disseminate risk information on SRH
4. Provides counterpart budget for prepositioning RH supplies and commodities, capacity building, local service providers, and meetings on MISP-related activities
5. Records the status of MISP indicators in the LGU scorecard for the Seal of Good Governance

MISP

Minimum Initial Service Package

for

SRH

Sexual and Reproductive Health

*Briefer and Policies on MISP for
Local Government Units and
Organizations*

*"We must work together to leave
no one behind."*

WHAT IS MISP?

Minimum Initial Service Package (MISP) for Sexual and Reproductive Health (SRH) is a set of basic reproductive health services designed to “prevent maternal and neonatal mortality, morbidity and disability, reduce HIV transmission, prevent and manage sexual violence among populations affected by disasters in a humanitarian crises, particularly women and girls.”

IMPORTANCE OF MISP

Conflicts and disasters disproportionately affect women/girls and their children raising risks to health and wellbeing due to the abrupt loss of basic health services, magnified cases of malnutrition, disease, trauma, and violence. Pregnant women and girls in emergencies may give birth without the most basic support for a safe and clean delivery.

MISP OBJECTIVES

During the onset or in times of imminent disaster the following are the objectives of MISP Proponents.

- 1 Ensure the health sector/cluster identifies an organization to lead the implementation of the MISP
- 2 Prevent sexual violence and respond to the needs of survivors
- 3 Prevent the transmission of and reduce reduce morbidity and mortality due to HIV and other STIs
- 4 Prevent excess maternal and newborn morbidity and mortality
- 5 Prevent unintended pregnancies
- 6 Plan for comprehensive SRH services, integrated into primary health care as soon as possible

POLICIES REQUIRING DELIVERY OF MISP

- **Implementing Rules and Regulations (IRR) of Republic Act No. 10354 Section 4.15**
- **Department of Health Administrative Order 2016 – 0005**
- **Joint Memorandum Circular Order 2017 – 001**
